DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 are , drawn to an exposure device(apparatus), classified in class 250, subclass 492.22.
- II. Claims 5-7,are drawn to and exposure method , classified in class 430, subclass 123.
- III. Claims 8-33, are drawn to a method of manufacturing a semiconductor device , classified in class 438, subclass 234.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and II are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process namely exposing the photosensitive film from the front side of the substrate instead of the claimed back side of the substrate.

Inventions Group I and III are related as combination and sub combination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the sub combination as claimed for patentability, and (2) that the sub combination has utility by itself or in other

combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the sub combination as claimed because the claimed semiconductor does not require the photolithography apparatus. The sub combination has separate utility such as semiconductor device does not require the photolithography equipment when the semiconductor device is used in computer equipment.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

A telephone call was made to Edward D. MAnzo on September 25, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
